新興毒品 包裝以假亂真

你以為的「潮流」可能只是「隨波逐流」
來路不明的商品，無法知道實際成分，有危害健康的隱憂，甚至可能參雜依托咪酯、大麻、甲基安非他命、愷他命等毒品。

別讓一口好奇，換來一生傷害

留意網路涉毒陷阱

千萬別滑進毒坑

別亂加！

熱情網友、好康群組，
可能正在販毒

別輕信！

免費試用、紓壓解悶，
恐怕只是話術

別嘗試！

網路社群或直播購買的食品
來源不明，可能是毒品！

慎選打工
別成了運毒幫手

高薪輕鬆？小心掉入運毒陷阱

- 異常高薪，工作內容模糊不清。
- 要求運送不明包裹，或代收不明款項。
- 雇主不願簽約、公司資訊不透明。
- 只是跑腿，卻要出入複雜場所。
- 幫忙運毒，即使不知情，也可能觸犯重罪！打工前務必查證，或先向師長諮詢。

電子煙
毒害健康的潮流陷阱

甜蜜煙霧背後的雙重危機

電子煙油加熱後會產生
致癌物質，比你想的更危險

多種口味的電子煙油，更容易
在不知不覺間滲入依托咪酯、
大麻或安非他命

別為了追求潮流
而犧牲健康

依托咪酯的隱藏危機

1 失去意識·記憶斷片

吸入30秒內起效，
事後完全不記得
發生什麼事

2 被侵害、被控制風險高

喪失自我保護
能力，或因上
癮被控制

3 危害交通安全

以為只吸一點沒關係，但
藥效發作迅速，反應不及

4 呼吸停止·致命風險

大量使用可能呼吸抑制，
輕則昏迷，重則死亡

關於依托咪酯的Q&A

Q：依托咪酯有什麼誘惑？
A：因為起效迅速，快速獲得酥麻放鬆快感。

Q：使用依托咪酯會怎樣？
A：無法控制身體，頭暈、身體抖動，甚至是永久的神經損害。

Q：依托咪酯是什麼味道？
A：市面上的依托咪酯常摻在花果香的煙油中，掩蓋加熱後的輪胎焦味，不易察覺。

Q：這是只有在夜店才會出現的吧？
A：不是。學校附近、補習班外、網路交友，只要來路不明都有風險。

Q：身邊有朋友在使用，我該怎麼辦？
A：確保意識與安全、尋求師長或家長協助、撥打求助專線0800-770-885、鼓勵向戒癮機構求助。

Q：我沒有抽，只是幫忙拿一下煙，應該沒事吧？
A：有事！依毒品危害防制條例，只是持有也有罪！

New Drugs
The Packaging Will Trick You

Think you're on top of the trend? You might be about to hit rock bottom
If something comes from who-knows-where, there's no way to know what's really in there. It could harm your health, and it could be mixed with etomidate, marijuana, methamphetamine, ketamine, or other drugs.

Don't let 'one little try' mess up your entire life

For more information, contact your local city/county drug abuse prevention center:

Watch out for internet drug traps!

Don't scroll yourself into a hole!

Be careful who you friend!

An enthusiastic internet friend or e-shopping group might actually be pushing drugs

Be careful who you trust!

"Free to try" or "relieve stress" are just tricks

Don't even try!

Don't let the stranger behind the screen lead you down a path with no way out!

Foods from social media groups and direct sales could come from anywhere – they might contain drugs!

Choose jobs carefully Don′ t become someone else′ s mule

“Easy work for high pay”? Be careful you don’t fall into drug running

- **Suspiciously high salary, with unclear work requirements.**
- **Requires you to deliver mysterious packages, or receive unexplained funds for others.**
- **Employer unwilling to sign a contract, or company information isn’t transparent.**
- **Just “running errands”, but requires you to go into strange locations.**
- **If you help transport drugs – even if you aren’t aware you’re doing it – you can still be guilty of a major crime! Before you start any job, make sure you get all the facts, and check with your teachers/older students.**

E-cigarettes

The fashion trend that destroys your health

Two dangers behind sweet-smelling vapes

Vape juice produces carcinogens when heated. It's way more dangerous than you think!

With all the different flavors of vape, it's easy to get into etomidate, marijuana, or amphetamines without knowing it.

Don't sacrifice your health just for the sake of chasing trends!

What is etomidate?

A fast-acting intravenous anesthetic. Etomidate is currently listed as a Category Two narcotic. It is often mixed into e-cigarette liquid (vape juice). Illegal possession and use carry criminal penalties. Don't believe the lie that it's "not addictive".

Etomidate
Hard to kick once you become addicted

Etomidate quickly creates psychological dependence! Stopping use often results in anxiety, insomnia, and other withdrawal symptoms, making it very hard to quit.

The Hazards of Etomidate Addiction

1 Loss of consciousness, fragmented memory

Takes effect within 30 seconds of ingestion; later, you have no memory of what happened

2 High risk of being assaulted or controlled

Might lose your ability to protect yourself, or fall under someone else's control due to addiction

3 Traffic hazards

Think just a little won't hurt? The drug acts quickly, making you unable to react in time

4 Lethal risk that breathing will stop

Ingesting large amounts can inhibit breathing, causing coma or even death

Questions about etomidate

Q: What draws people to etomidate?
A: It acts quickly, creating numbness and relaxation rapidly.

Q: What happens when you use etomidate?
A: You become unable to control your body, get dizzy, have tremors, and even permanent nerve damage.

Q: What does etomidate taste like?
A: Etomidate found on the market is often mixed into fruit-flavored e-cig vape juice. This covers over the burnt rubber smell that results when it is heated, making it hard to detect.

Q: This kind of thing is only found in night clubs, right?
A: Wrong! Near school campuses and cram schools, acquaintances online – there's a risk any time you don't know what you're getting into.

Q: A friend of mine is using it. What should I do?
A: Make sure they're conscious and safe, then find a teacher, older student, or parent to help. Call the assistance line at (0800) 770-885, and encourage your friend to get help from an addiction recovery organization.

Q: I didn't smoke any, just held it for my friend for a bit. That should be okay, right?
A: Wrong! In accordance with the Narcotic Hazards Prevention Act, just possession is a crime!
