The screenshot shows the De Gruyter homepage. At the top, there is a search bar with the text 'Search De Gruyter' and a magnifying glass icon. To the right of the search bar are links for currency selection (EUR, EN, USD) and a login button. Below the search bar, the page is divided into several sections. On the left, there is a 'Subjects' sidebar with a list of academic disciplines. In the center, there are three main columns: 'New books in all subjects', 'New articles in all subjects', and 'New in open access in all subjects'. Each column contains a list of recent publications with their titles and authors. At the bottom of the page, there is a '篩選標籤' (Filter tags) section. The page is annotated with numbered circles 1 through 6, pointing to specific elements: 1 points to the search bar, 2 points to the currency links, 3 points to the language links, 4 points to the shopping cart icon, 5 points to the login button, and 6 points to the filter tags section.

OVERVIEW CONTENTS

About this book

Starting with an overview of current research progresses on multiple access technology, the book then presents the theoretical fundamentals, technical principles, transmission scheme, key technologies and evaluation results of new multi-access technologies, especially focusing on its typical applications 5G communication systems. With extensive practical cases, it is an essential reference for researchers, engineers and graduate students.

- Introduces new multi-access technologies, covering both classical and recent results
- Focuses on the applications of new multi-access technologies in three scenarios of 5G communication systems
- Extensive practical cases to facilitate understanding

EDITORIAL

About this journal

Nanophotonics covers recent international research results, specific developments in the field and novel applications and is published in partnership with Sciencewise. It belongs to the top journals in the field. *Nanophotonics* focuses on the interaction of photons with nano-structures, such as carbon nano-tubes, nano metal particles, nano crystals, semiconductor nano dots, photonic crystals, tissue and DNA. The journal covers the latest developments for physicists, engineers and material scientists, working in fields related to:

Abstract

In this present article, synthesis, characterization, and study of optical parameters through image enhancement methods have been carried out on 4^l-hexyloxy-4-cyanobiphenyl (6OCB) pure liquid

DE GRUYTER
MATHEMATICS

At De Gruyter, we have been publishing research in all of the key areas of mathematics for nearly 200 years. We are particularly well-known for our book series, including De Gruyter Expositions in Mathematics, De Gruyter Studies in Mathematics, De Gruyter Series in Nonlinear Analysis and Applications, De Gruyter Series in Discrete Mathematics and Applications, De Gruyter Series in Probability and Stochastics, De Gruyter Series in Applied and Numerical Mathematics, De Gruyter Series in Logic and Its Applications, the Radon Series on Computational and Applied Mathematics and Advances in Analysis and Geometry.

NEW RELEASES

附錄：搜索關鍵詞

檢索對大小寫不敏感

這表示您在檢索時可以不區分大小寫。

例如：

輸入“pascal”時會檢索到同時包含“pascal”與“Pascal”的文章。

布爾運算符

在搜索字段中使用布爾運算符 **AND**、**OR** 和 **NOT** 後，您可以指定檢索詞之間的邏輯關係並執行檢索。如果不使用運算符，則您輸入的檢索詞將默認在全字段建立 **AND** 邏輯關係。

短語

若要搜索包含某個精確的短語的文檔，請用引號將該短語括起來。短語檢索中，**AND**、**OR** 和 **NOT** 將不會作為布爾運算符處理，也不會刪除停用詞。

例如：

輸入“computational linguistics”將顯示這兩個詞作為一個短語出現的文章

輸入 computational linguistics 將顯示包含兩個單詞的檢索結果（不論這兩個詞分開與否）

特殊字符與變音

您可以自由使用變音或者ß。系統將搜索帶變音與不帶變音的兩種關鍵詞。
